

FLEX 200

PILOT / PRODUCTION SCALE TABLET COATING SYSTEM

FLEX 200

The Thomas Processing LLC FLEX 200 is a fully integrated, recipe driven Pilot / Production Scale tablet coating system with exchangeable drums. Designed to offer a wide variety of industry leading high-performance features, the FLEX 200 features external gun positioning, auto unload, patented Thomas Spray Bar with Schlick ABC technology, and exchangeable drums allowing for capacity range of 30-325 Liters. Thomas Processing LLC FLEX 200 also comes available with Wash-In-Place configurations and an optional containment version for use with highly potent products.

HIGH-PERFORMANCE FEATURES

- Thomas Processing LLC Swift Change Drum Exchange System
- Patented Thomas Processing LLC Spray Bar
- External Gun Positioning Auto-Unload
- Exchangeable Drums with 30-325 Liter Capacity Range
- Wash-In-Place Options

THOMAS PROCESSING LLC SWIFT CHANGE DRUM EXCHANGE SYSTEM

Continuing the history of innovation and technical advancement, the FLEX 200 features a proprietary Thomas Processing LLC Swift Change Drum Exchange System. Designed to decrease the changeover time and improve cleanability, the FLEX 200 is designed to accept cartridge like drums with pre attached exhaust plenum making the drum exchange process a breeze.

INDUSTRY PROVEN FULLY PERFORATED DRUM DESIGN

- Maximum coating quality
- Maximum tablet coating efficiency
- Ideal mixing action
- Turbulence-free air flow path
- Suitable for Film, Functional, Sugar and Drug Layer Coating

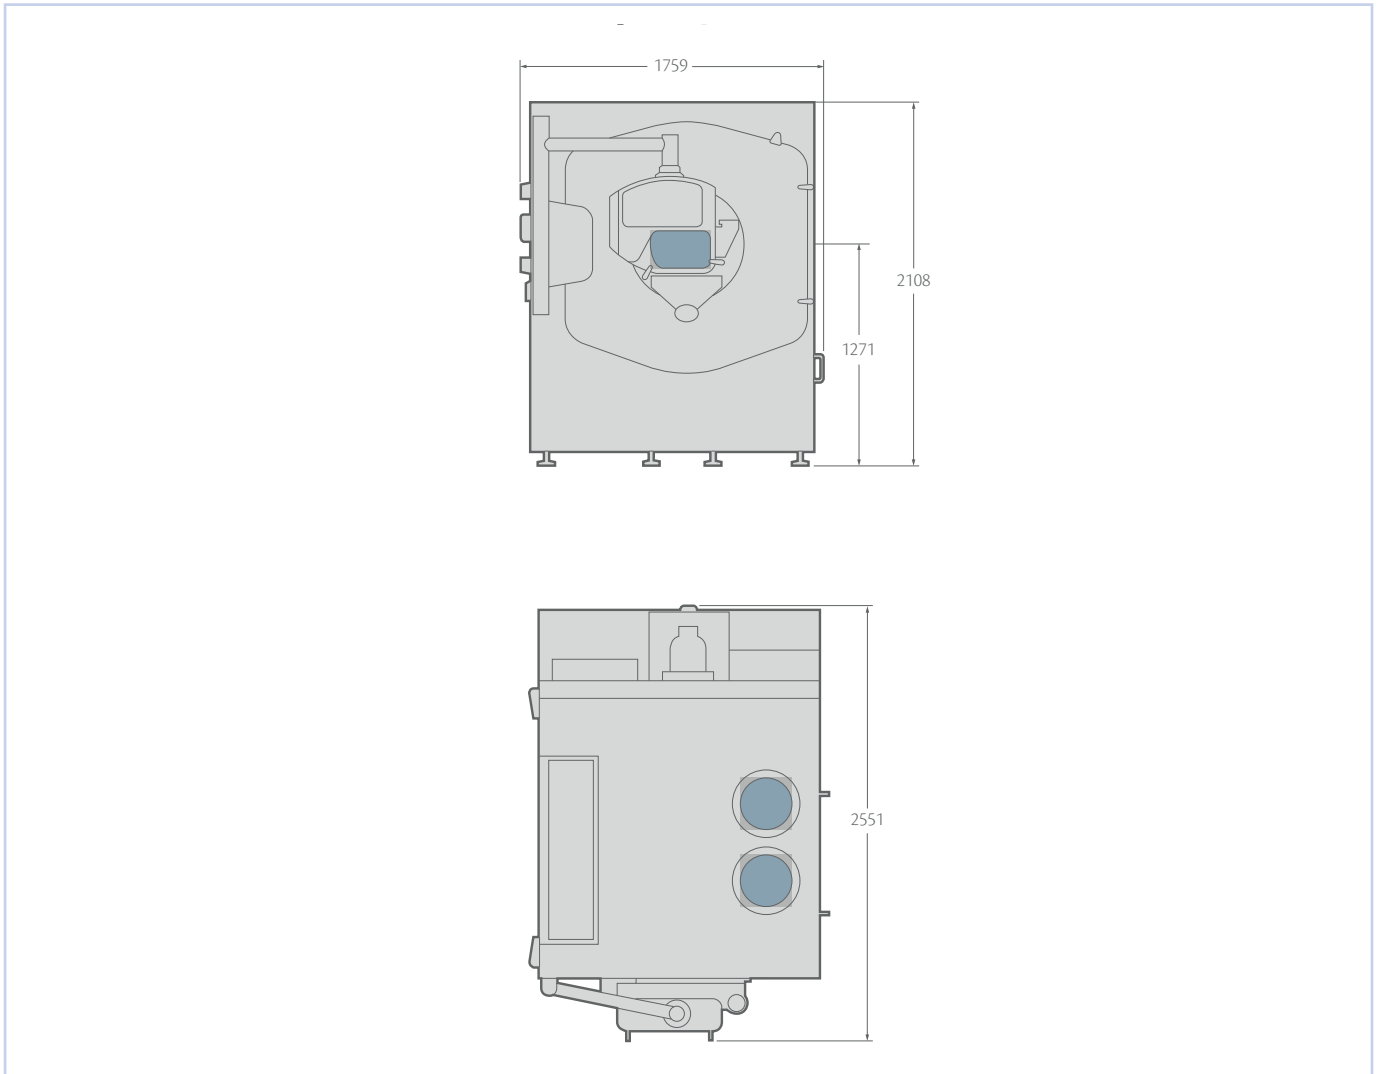

COMPU-COAT CONTROLS

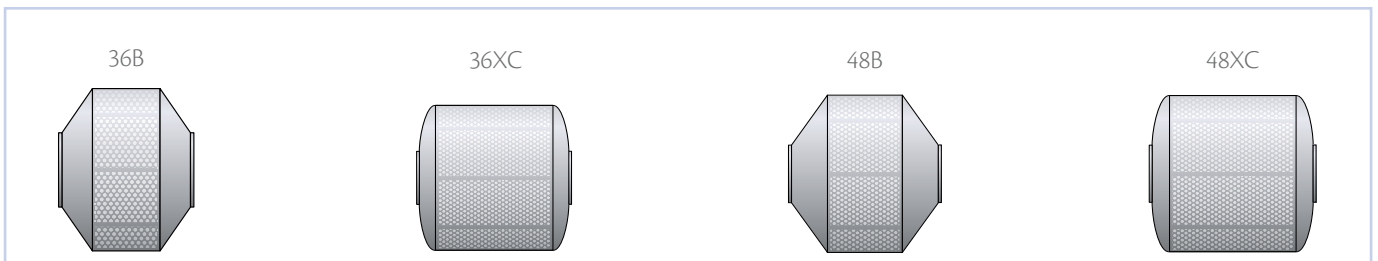

Thomas Processing LLC FLEX 200 is offered with the state of the art recipe driven controls system featuring our latest Compu-Coat multi-language operating system. The FLEX 200 also features the patented Thomas Processing LLC Spray Bar with external gun positioning. The FLEX 200 provides for the ultimate in coating versatility making the FLEX 200 suitable for Film, Functional, Sugar and Drug Layer Coating.
